# Preface

A template to initialize templating projects that comply with best practices on sustainable software in Natural and Engineering Science. This template contains boilerplate for developing custom research software templates using [copier](#).

# 1 Introduction

Explain wha value does the use of meta templates give to the scientific community across NL. Knuth (1984)

**Part I**

**USE CASES**

## 2 Python Packages

Describe the Python use case for TU Delft

## 3 Jupyter Notebooks

Explain the case for using Jupyter Notebooks
