Preface

A template to initialize templating projects that comply with best practices on sustainable software in Natural and Engineering Science. This template contains boilerplate for developing custom research software templates using [copier](#).

Explain what value does the use of meta templates give to the scientific community across NL.

Part I

TEMPLATES

1 Meta Template

What is the meta template

2 Templating Projects

How to use the meta template to set up a templating project

Part II

USE CASES

3 Python Package

Describe the Python use case for TU Delft. Knuth (1984)

4 Jupyter Notebooks

Explain the case for using Jupyter Notebooks

5 R Package

Describe the R use case
